EDUCATION

Singapore University of Technology and Design (SUTD)

Computer Science and Design, Bachelor's Degree

Singapore
Sep 23 - Present

- Specializing in the Artificial Intelligence, Data Analytics and Financial Technology | CGPA: 3.6
- Awarded the Undergraduate Merit Scholarship for full course duration (4 years)

Global Indian International School(GIIS)

International Baccalaureate Diploma Programme

Singapore
Jul 21 - May 23

- Recipient of the Global Citizen Scholarship (2 years, Grade 11 & 12)

WORK EXPERIENCE

Covalent Capital

May 26 - Aug 26

Financial consultant in Singapore, Data Analyst Intern

Singapore

- Analyzed and reported on bond issuance data across Nucleus and OMAS platforms to support real-world debt capital market workflows.
- Spearheaded data operations by cleaning, structuring, and visualizing complex datasets to improve internal product analytics and reporting.
- Supported the development of AI-driven tools, focusing on document analysis and intelligent product workflows within the IRIS ecosystem.

Accenture

Aug 25 - Dec 25

IT Consultant Company, Software Engineering Intern

Singapore

- Developed thorough test cases for a government HR system, covering both standard user flows and edge scenarios
- Created detailed process flow diagrams to simplify complex system workflows
- Supported Application Maintenance Support (AMS) audits by documenting change rationales
- Built automation tools for onboarding tasks and employee time/leave logging to streamline everyday processes.

TBO.com

Jul 24 - Aug 24

Online Travel Agency, Data Analyst Intern

Gurugram, India

- Conducted behavioral analysis using Amplitude on 50K+ user sessions
- Identified key drop-off pages and contributed actionable insights to CPO
- Received direct commendation for initiative and high-impact analysis

The Red Lotus

Apr 21 - Dec 23

Non-profit Organization, Graphic Designer

Singapore

- Created visual campaigns on sustainable menstrual practices
- Increased engagement by 40% through design strategy

Bob Air Travel Services

Nov 20 - Dec 22

Travel Agency, Graphic Design Intern

New Delhi, India

- Created engaging digital designs for online marketing
- Increased engagement by 40% through design strategy

PROJECTS

Match-and-Go! Multimodal Travel Recommender

Jan 26 - May 26

Python, XGBoost, LightGBM, FastAPI, React, Vite

Singapore

- Trained an XGBoost LambdaRank model on 2.5M user-destination pairs across 500 global cities, achieving NDCG@5 of 0.9588
- Built the end-to-end ML pipeline and integrated a FastAPI backend with a React frontend for real-time personalized travel recommendations

KidShield — Multi-Modal AI Child Safety System (Academic Project)

Jan 26 - May 26

Python, PyTorch, ViT-Base/16, Flask, JavaScript, Chrome Extension API

Singapore

- Fine-tuned ViT-Base/16 on ~88,000 video frames across 4 harmful content classes, achieving macro F1 of 0.8725 and 0.946 F1 on explicit content detection
- Built end-to-end deployment pipeline from TorchScript model export to Flask API and Chrome extension with real-time image blurring

Undergraduate Research Opportunities Programme**May 25 – Aug 25****Detection of AI-generated Code & Similarities****Singapore**

- Conducting research on code similarity using BLEU and Fahrenberg text distance to differentiate between human-written and AI-generated code

Hotel Booking Web Application (Industry Collaboration with Ascenda)**May 25 – Aug 25****Full Stack React JS, Node.js, MongoDB, Rest APIs****Singapore**

- Developing a full-stack hotel booking platform with responsive frontend interfaces and secure backend services
- Achieved high performance ratings from both faculty and Ascenda industry graders for code quality, system architecture, and user experience design.

Parcel Tracking Android Application**Jan 25 - May 25****Android Studio, Java, Firebase, NoSQL, Web APIs****Singapore**

- Designed and built a mobile application for AI-driven parcel detection and tracking

SKILLS

- Languages: Python, Java, JavaScript, HTML, SQL
- Frameworks: React, Node.js, Express, Flask, ViT-Base, PyTorch, Timm, FastAPI, XGBoost, LightGBM, scikit-learn, pandas, NumPy
- Tools: Git, GitHub, Amplitude, Figma, Firebase, Tableau, Kaggle, Chrome Extension API, Postman, Vite
- Databases: MySQL, MongoDB (basic)
- Other: Full-stack Web & Mobile Dev, REST APIs, Agile/Scrum, FPGA prototyping, Computer Vision, Fine-tuning Transformer Models, Model Deployment, Machine Learning Pipeline Development, Learning-to-Rank, REST API Integration
- Communication, Collaboration, Public Speaking, Leadership

ACHIEVEMENTS

- National Prize Winner – CBSE Regional Science Fair ("Grey Go Green")
- Inter-school Public Speaking Finalist (Debates, Elocution)
- Robotics Club Member – Competed in regional robotics tournaments
- Served as Teaching Assistant for Modeling and Analysis at SUTD

ADDITIONAL INFORMATION

- Languages: English (Native), Hindi (Fluent), Punjabi (Fluent), French (Intermediate)
- Interests: Visual Arts & Illustration, App Design, Music
